

Applying 2-Way reversible use for various tune

【 Contact lines UP 】

By raising the center of gravity of the spring, the droop of the suspension is induced and the kicking out feeling is stronger.

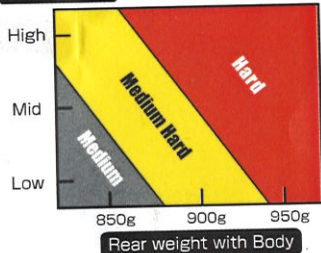

【 Contact lines Down 】

By lowering the center of gravity of the spring, excessive suspension movement is suppressed and stability is increased on low grip surfaces.

【 Spring initial placement 】

Empty	Empty	Medium	Medium Hard	Hard
--------------	--------------	---------------	--------------------	-------------

Surface Grip

Dedicated spring for concrete road and tile roads
